

Year 2: Habitats

Habitat - A habitat is the natural place something lives. A habitat provides living things with everything they need to survive such as food, shelter and water.

Microhabitat - A microhabitat is a very small habitat in places like under a rock, under leaves or on a branch. Minibeasts live in microhabitats. The microhabitats have everything they need to survive.

Depend - Many living things in a habitat depend on each other. This means they need each other for different things.

Survive - This means to stay alive.
