

## Year 7 Geography Learning Map

- TERM 1 -

### My Local Place and Geography in the Field

This term you will study the key knowledge of place, using maps and the ability to understand your local area before using some of that knowledge out in the field, where you will conduct your very own piece of geography fieldwork.

#### LINKS TO PRIOR LEARNING

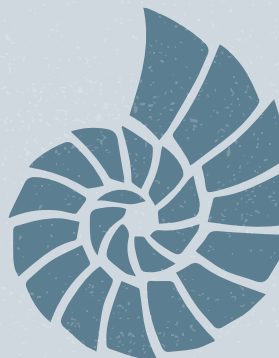

You will use your geographical knowledge from primary school related to using atlases and general knowledge of the world to really help you with this term's work.

- TERM 2 -

### Africa and Fantastic Places

This term you will be studying the continent of Africa; paying particular attention to the Horn of Africa and the impact the 2010 World Cup in South Africa had on its people. We will then travel the world and look at specific environments such as the world's deserts and cold environments.

#### LINKS TO PRIOR LEARNING

You will use your knowledge from previous topics related to the use of atlases to support your wider understanding of different places in the world.

- TERM 3 -

### Connected World

In the final term, we will move from Fantastic Places and begin to look at how the world is connected with each other. We will look at where your most expensive trainers are created and how that makes you a 'global citizen'.

#### LINKS TO PRIOR LEARNING

You will use your previous knowledge from development in Africa; the location of biomes and the knowledge of major cities to support your understanding of where people live and why. Also, you will appreciate how you can impact someone else in a different country.
