

Big Wide World

Words of Wisdom:

Life cycle	
Growth	
Materials	
Weather	
Minibeasts	
Gratitude	

Learning opportunities

During this half term we will be learning about our wider environment. What is the Earth? What animals do we share the Earth with, where do they live? We will be thinking about the different materials we use to build and construct and do these materials differ in different places? We will think about our food and where that comes from? We will investigate the different types of weather and create a rain gauge.

We will investigate some life cycles including Chickens, Butterflies and Frogs.

A focus throughout the half term will be on what makes a good friend and how we can become one. We will also think about our school community and where we fit within it.

How can you support this topic at home?

Talk to your child about their immediate environment and then the wider world. Discuss the different animals they know and talk about where they come from.

- Visit a farm or visit the library to find books about different animals.
- Encourage your child to talk about the weather maybe make a weather chart or a rain catcher.
- Share some of the books we will be reading with your child. (Your local library will have copies of them, or the stories are available on YouTube)
