

LEARNING JOURNEY Statistics

Processing and representing data

Year 10 Unit 2

As a Statistician, it is important that we can represent data and interpret given representations. In this unit we will learn how to represent data and which evaluate the different representations. One goal of statistics is to make data easier to understand for others. Representations form a key part of this.

TUDOR HABITS AND VALUES: You will build evaluative and representation skills. Additionally, you will learn how to honestly represent data without bias

VOCABULARY

- | | |
|---|--|
| ☐ Population pyramid | ☐ Bar chart |
| ☐ Choropleth map | ☐ Pie chart |
| ☐ Cumulative frequency | ☐ Pictogram |
| ☐ Format | ☐ Frequency polygon |
